

COMMERCIAL: ARTIST STUDIO & GALLERY

136 Blackstone Street
Boston, MA

Creating the Artist Studio and Gallery will enable modern day artists to collaborate among their peers and shine light on all of the different forms of art currently being made. The essence of the De Stijl movement will prevail through the collaboration, appreciation, and exhibition of different art forms. 3 different art pieces made during the movement were chosen and display cases were made for each chosen piece. These displays were then placed within the interior space.

These images were rendered using AutoCAD, Sketchup, Kerkythea, and Photoshop.
