## RESIDENTIAL: LOFT

### Bay Village

This loft was designed as faculty housing for the New England School of Art and Design at Suffolk University. The eye of a storm served as the main concept; the raging storm [the city of Boston] would circulate around a small piece of tranquility [the loft]. This resulted in a safe, calm, and relaxing environment for 1-2 temporary staff members.

These images were rendered using AutoCAD, Sketchup, Photoshop, and hand rendering.
